Real Time Video on all channels

The Compact can record real-time video and 4 channels of audio from each of its camera channels so you don't need to miss a thing.

Remote Internet Monitoring

This superb DVR is supplied with a free copy of SightBoss™ the multi-site central monitoring station software. Find out more at www.sightboss.com.

Network

Using the SightBoss software supplied, this DVR can be networked so that any user in the business can monitor the CCTV images.

PTZ support

Despite its small price tag, the Compact is big on features. It can offer local and remote operation of most PTZ cameras on the market, it works with a massive 33 protocols!

Talk-Back

A built in 2-way audio channel allows a user to talk back to areas under surveillance using an external speaker or tannoy system.

FREE

Easy local and remote back up

Video evidence can easily be backed up locally by the user to a USB flash stick or an internal CD/DVD writer. For backing up files over the network and internet, SightBoss client software can download files for back up to a local PC's internal CD/DVD writer or hard drive.

It's a great choice for most small CCTV camera systems. Its simple to use for any home or business owner. It provides Real Time video from all camera channels and can be accessed using the free software supplied on a network or over the internet.

With a massive capacity, the unit can record all channels in real time for over a month. This can be extended much further using the scheduling, alarm event and video motion detection features that can be programmed into the DVR.
